A patient’s Electronic Health Records (EHR) includes information such as patients’ medical history, pharmacy, pre-existing conditions, laboratory tests, X-Rays, and other medical details.

There are eight tabs in the EHR.

- **Treatment Plan** ➔ This is where treatment planning starts.
- **In Progress** ➔ This is where incomplete procedures from the treatment plan are listed.
- **Perio** ➔ This is where Charts can be created and stored to the patient’s record.
- **Treatment History** ➔ This is where previously-completed procedures are listed.
- **Forms** ➔ This is where most forms can be found.
- **Attachments** ➔ This is where axiUm stores previously-scanned documents.
- **Labs** ➔ This is where Lab orders and Lab forms can be entered and found.
- **Prescriptions** ➔ This is where Prescription orders and forms can be entered and found.
