Introduction

This document will show you how to print consents and instruction forms from the axiUm EHR, using the example of Periodontics consents and forms.

1. On the chart of the patient for whom you wish to print a form, select the Attachments tab. Under Section, choose the section from which you wish to select the form.

3. Tabs will appear in the lower area, listing items available in the section you chose. Select the Consents tab, for list of consents.

4. Click on the plus sign to open the Add Patient Consent box.

5. Click the ellipsis next to Consent to show available consent forms.

6. Select your desired form from the list.
In the Add Patient Consent box, the selected form should now be listed. Click Ok.

Your form will be generated. Click printer button to print.
